

Looking down into canyon from "Nature Trail." You have climbed 1500 ft. in elevation and down 15° in summer temperature. Hunters say this is the place deer die of old age.

End of "Geologic Trail." Children standing on ancient sea shore 1500 ft. above the level of Utah Lake seen in background. From this vantage point much of the earth's history unfolds in geologic formation.

#### SKY RIDE STATISTICS

1. Steepest aerial tramway in world — 45°.
2. Station-to-station distance, 1753 ft.
3. Verticle rise 1228 ft.
4. Operates on "jig-back" system — like buckets in a well.
5. Cables suspended from "Deadman" at top terminal. Over 65 cu. yards concrete imbedded in limestone formation.
6. Safety factor of 5. (Designed to carry 5 times capacity load of six 200 lb. men.)
7. Built in Switzerland. Meets all Swiss Government specifications.
8. Only tramway in world adjacent to a national highway, located on a riverbank, passing a waterfall, and landing on a precipice with mountains so close you can nearly reach out and grab one.
9. Barbeque, nature trails, picnic area at top terminal.
10. 3 minutes up, 3 minutes back, stay as long as you want to.
